

EPI PU-Sport

Overview all series

Description

PU-Sport is a seamless point-elastic indoor sports floor. The system consists of a prefabricated granular rubber base mat with a 2 mm self levelling elastic polyurethane toplayer covered by a wear resistant mat top coat finish. This complete system is DIN-tested.

Important

- Application conditions:
Minimum sub-floor temperature: 10°C and 3°C above the dew-point.
Optimum application temperature: 20°C.
Maximum atmospheric Relative Humidity (R.H.): 85%.
- Store exclusively in the original packaging and store in a cool, dry, well-ventilated place.
- The substrate to which the product is applied should be dry, clean and free of any greasy substances. Prepare a test surface first in case of any doubts regarding good adhesion properties.

System Use

Floorings in sports halls, gymnasiums and all other facilities for the usual indoor sports, gymnastics, aerobics, etc. The PU-Sport system is multi-functional and therefore also very suitable for exhibitions, festivals, meetings, etc.

* THICKNESS OF THE DIFFERENT SYSTEMS VARIES ACCORDING TO THE PREFERRED SPORT AND MULTIFUNCTIONAL PURPOSES.

Systems

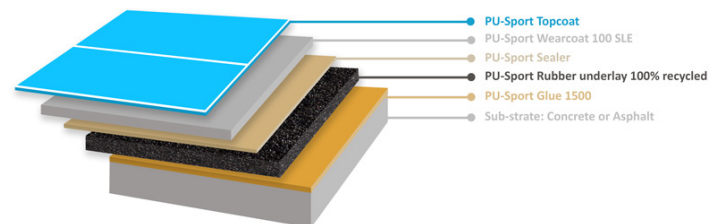

Product	Thickness in mm		
	Total thickness	Bottom layer: recycled rubber	Self levelling polyurethane resin
PU-Sport 700	7	5	2
PU-Sport 900	9	7	2
PU-Sport 1100	11	9	2
PU-Sport 1600	16	14	2

Note: other thicknesses available upon request

System Build Up PU-Sport Systems

BUILD-UP PU-Sport *

- Adhesive; PU-SPORT Glue, two-component polyurethane.
- Base Mat (Resilient); Granulated rubber containing a binder.
- Base Mat Sealer; PU-SPORT Sealer, two-component polyurethane.
- Polyurethane Resin; 2 mm PU-SPORT two-component, pigmented, solvent free polyurethane self levelling layer.
- Coating; PU-SPORT Topcoat, two-component, pigmented polyurethane surface paint.
- Game lines; PU-SPORT Game Line Paint, two-component, pigmented polyurethane lining paint

* THE USE OF ANY NON-APPROVED COMPONENT SUBSTITUTIONS, AS PART OF THE COMPLETE SYSTEM BUILD-UP, SHALL VOID PRODUCT WARRANTY.
