

EPI Track SW PF

Athletic Track System

Description

EPI Track SW is a high performance, IAAF certified, athletic track system. It is a water impermeable surface which is highly spike resistant. EPI Track SW is excellent choice for training as well as competition purpose, due to it's structured top layer it can also easily be used when it is wet or raining.

Properties / Product Advantages

- IAAF certified
- Fast installation
- Minimum injury risk
- Low maintenance costs
- Seamless PUR/EPDM top layer
- Optimised force reduction
- Long lasting performance and durability
- Highly slip resistant
- Optimal protection for the athletes
- Pre-fabricated underlay: SBR rubber roll base mat

Installation

Installation of EPI Track SW is constructed pre-fabricated rubber roll base mat of SBR granules bonded with a polyurethane elastomer.

The pre-fab base mat is glued down to the sub-floor with a long lasting 2-component polyurethane adhesive, PU-Sport Glue. The base layer is sealed with a 2 component polyurethane EPI Track Sealer. A final topping of coloured EPDM granules broadcast onto a wear coat of polyurethane compound, PU-Sport 710 SW is applied on top.

Technical Data

- Sandwich system – wear coat & pre-fab SBR base mat
- Force reduction 41%
- Thickness 13,1mm
- Vertical deformation 2,01 mm
- Friction 0,71
- Tensile strength 0,53 MPa
- Elongation at break 53 %
- Non-porous
